

SAP Analytics Cloud QuickLaunch

Overview

Experience the benefits of integrated BI, Planning and Predictive capabilities - together on one simple cloud platform. A solution that provides everyone in your organization, from the boardroom to the front line, the ability to discover actionable insights.

Many businesses are rapidly moving their analytics and planning solutions to cloud platforms. For SAP customers that means adopting SAP Analytics Cloud! Today's businesses require real time insights combined with flexibility and collaboration capabilities. Method360, in partnership with SAP has developed SAP Analytics Cloud - Quick Launch solution to enable clients to take advantage of SAC's capabilities within a single week.

Case Study

Client:
Petroleum Refining Company

Challenge:
In the midst of an acquisition, the company acquired 250 SAP Analytics Cloud (SAC) licenses at the direction of the CIO for the purpose of implementing SAP's latest Analytics and Visualization solution. It was promised by SAP that the project team would provide dashboards within two weeks.

Solution/Benefit:
By the end of the engagement, Method360 helped deliver:

- A Dashboard in the first 2 weeks, as promised
- Live Data and Import Data connections to BW/4HANA
- Executive Finance dashboard, complete with a Digital Boardroom presentation
- Commercial P&L dashboards
- An approval/Planning tool Proof-of-concept

SAP Analytics Cloud (SAC) QuickLaunch Key Benefits

SAP Analytics Cloud QuickLaunch in its essence, is a bundled program offered by Method360 which gets your productive in your instance of SAC in as little as a single week for a single use-case.

The idea is *rapid adoption* of a next generation analytics, planning, and visualization tool that is native to your SAP application stack. Take the first step, get your key stakeholders on-board and actively using SAC as the tip of the spear for a broader adoption of functionality.

Deploy a productive, cloud-based Analytics and Visualization capabilities with your use-case

- Avoid many of the costs necessary to launch and support a full implementation
- Up and running in a minimum of one and a maximum of four weeks with a very low cost

How We Do It

Our team of experts will confirm your use case, success criteria and the status of your data. Once this is understood, the rest is a bit easier. We'll load the data into your installed SAP Analytics Cloud instance, develop all models and calculations to support the use-case, then proceed as follows:

- Develop visualizations with multiple playbacks
- Formal Playback and Hand-off
- (Optional) Identify appropriate source (HANA Model, S/4HANA, BPC DataSources, etc.)
- (Optional) Establish integration between source system and SAC (Cloud Connector)
- (Optional) Link story to new model with no interruption on the business use of the system

Solution/Benefit:

- QuickLaunch uses your selected business use-case
- We use "your data" for a more impactful and productive deliverable
- Get insight into a specific business scenario
- Immediately see core capabilities within the platform
- No internal IT required

Assumptions:

- QuickLaunch is based on single business use case
- Up to 3 dashboards and 4-8 visualizations within the single data set
- Client will provide Use Case story to support Visualization build out prior to engagement
- Client will provide all necessary flat files before the engagement begins.
- Client Flat files will be provided in the format and detail required to support the requirements.
- Client can allocate the required resources to support activities during duration of SOW.
- The activities will be delivered remotely unless otherwise directed by Client.
- Method360's resource will have security access to systems if necessary
