

S/4HANA Readiness Assessment & Migration Playbook

Readiness Assessment Overview

Method360 has developed a comprehensive S/4HANA Roadmap and Assessment Playbook which goes beyond your typical sizing and duration models. In conjunction with guided workshops, we will evaluate your existing SAP system and provide deep insights required to provide a full SAP S/4HANA Conversion Playbook.

S/4HANA Assessment & Playbook

Method360 will deploy a cloud based application accelerator to capture data and assess your systems and do an impact analysis against the S/4HANA solution. We analyze the simplification items of S/4HANA with your legacy system, the custom code in your environment, the compatibility of any add-ons and any active business functions in your current system. Our team performs the assessment via the following:

The Assessment Report contains the following

**Roadmap & Value
Realization**

**Technical Impact
Analysis**

**Functional Impact
Analysis**

Project Plan

Housekeeping

S/4HANA Assessment Deliverables

Roadmap and Value Realization

- S/4HANA Adoption ROI Calculation
- S/4HANA Adoption Roadmap Synthesis
- Project Plan Generation
- UI and Reporting Strategy

Technical Impact Analysis

- Interface Impact Analysis
- Interoperability Analysis for transactions
- Dual Development Strategy
- Hardware sizing and Infra Recommendations
- Custom Code Impact Analysis
- HANA Custom Code Optimization Analysis

Housekeeping

- Analysis on the need for data archiving
- Table Cleansing Recommendations
- Identify unused custom code
- Advisory on Master Data

Functional Impact Analysis

- Business function Compatibility Assessment
- Industry Compatibility Assessment
- Fit Gap Analysis
- Recommendations on activities to be performed for conversion
- Industry Function and add-ons verification

Project Plan

- IT Effort Calculation
- Resource Estimation
- Cost Estimation
- Project Duration Estimation
- Testing strategy
- SAP Value Assurance recommendations

User Profile Analysis
Power user profiling based on user logs and activities

Custom Code Analysis
Analyse custom codes and S/4HANA repository changes

Interface Impact Analysis
Impact of integration changes with Non-SAP systems

Security Roles Identification
Understanding of roles and responsibilities of users

SAP Clone Analysis
Analysis on Performance metrics and incidents

HANA Code Optimization
HANA code impact including SAP S/4HANA simplifications

After we present the Assessment and Playbook findings and recommendations to your team, Method360 will provide you a link to access a dashboard & reporting capability which will provide all of the results and details of the assessment.

Playbook Benefit

Our customers enjoy the benefit of keen insights into the order of magnitude for implementing S/4HANA, highly customized to each client's technology and business requirements.

This provides the following benefits:

1. Advanced look at realistic budget requirements for the initiative
2. Duration estimate that is predicated upon numerous implementations and a proven algorithm
3. Quicker time-to-value on your S/4HANA journey
4. Identifies risk and potential roadblocks to be managed prior the project.
5. Provides both Technical and Functional Impact Analysis
6. Provides evaluation of Fiori capabilities against business requirement

For offering overview, Sample assessment deliverables, and/or demonstration, please contact your Method360 representative.

Method360 is the partner of choice to plan and manage your S/4HANA Conversion.

Our S/4HANA Services and solutions

- SAP S/4HANA Assessments
- S/4HANA Data Migrations capabilities
- SAP S/4HANA Implementation & Conversion
- SAP Landscape Transformation
- S/4HANA Embedded Analytics enablement
